

CONTACT LESS SANITIZER

Automatic Sanitizer Dispenser is a contactless machine which is used for sanitization and person hygiene and works when hands are placed under it.

It's mist based formula sprays only 5 -6 ml of sanitizer making optimum usage and economical for every cycle which last up to 5 seconds. It uses only 1/5th sanitizer as compared to normal drop based sanitizers.

Contactless technology works with high precision Ultrasonic Sensors to ensure zero touch along with high pressure Diaphragm pump which ensures complete sanitization of hands.

It is equipped with 8 Ltrs tank which can give 3000+ sprays shorts making it very economical.

Model No:

ALT-AUTOSAN-01T

ALT-AUTOSAN-02H

Features and Specification:

- Outer Body : ABS
- Sanitizer Container : 8 Ltrs ABS
- Solenoid Valve : 24V DC
- Diaphragm Pump : Pressure of 5 - 6 Bar
- Technology : Arduino
- Sensors : Ultrasonic
- Relay : 5 and 10 Amps
- Idle Power : 2.5 VA
- Running Power : 24 VA
- Weight : < 5.0 Kg
- Dimensions : 368 x 298 x 540 (L X B X H) Approx

*Conforming to DRDO specification

Sales / Service Support No: 9990-557-558

Manufactured By: ALTRA INTERNATIONAL, A – 9, WAZIRPUR INDUSTRIAL AREA, NEW DELHI 52
